## DESCRIPTION

The JTMA8862 series are low dropout, positive linear regulators with very low quiescent current. The JTMA8862 can supply 600mA output current with a low dropout voltage & very low output voltage.

The JTMA8862 regulator is able to operate with output capacitors as small as 1  $\mu$ F for stability. Other than the current limit protection JTMA8862 also offers on chip thermal shutdown feature providing protection against overload or any condition when the ambient temperature exceeds the junction temperature.

The JTMA8862 series are offering several fixed output voltage types including 1.0V ~ 1.5V.

The JTMA8862 series are available in low-profile, space-saving SOT-23-5L, SC-70-5L, SOT-223, SOT-89(R) & TO-252 packages.

## APPLICATIONS
